Keynote

Research in Program Repair and Approximate Computing: A Retrospective	1
<i>Martin C. Rinard (MIT EECS & CSAIL)</i>	

Formal Methods 1

SpecGen: Automated Generation of Formal Program Specifications via Large Language Models	16
<i>Lezhi Ma (Nanjing University, China), Shangqing Liu (Nanjing University, China), Yi Li (Nanyang Technological University, Singapore), Xiaofei Xie (Singapore Management University, Singapore), and Lei Bu (Nanjing University, China)</i>	
Gpass: A Goal-adaptive Neural Theorem Prover based on Coq for Automated Formal Verification	29
<i>Yizhou Chen (Peking University)</i>	
Formally Verified Binary-level Pointer Analysis	42
<i>Freek Verbeek (Open Universiteit & Virginia Tech), Ali Shokri (Virginia Tech), Daniel Engel (Open Universiteit), and Binoy Ravindran (Virginia Tech)</i>	
EffBT: An Efficient Behavior Tree Reactive Synthesis and Execution Framework	54
<i>Ziji Wu (National University of Defense Technology, China), Yu Huang (National University of Defense Technology, China), Peishan Huang (National University of Defense Technology, China), Shanghua Wen (National University of Defense Technology, China), Minglong Li (National University of Defense Technology, China), and Ji Wang (National University of Defense Technology, China)</i>	

Program Comprehension 1

An Empirical Study on Package-Level Deprecation in Python Ecosystem	66
<i>Zhiqing Zhong (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China), Shilin He (Microsoft, China), Haoxuan Wang (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China), Boxi Yu (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China), Haowen Yang (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China), and Pinjia He (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China)</i>	
Datalog-Based Language-Agnostic Change Impact Analysis for Microservices	78
<i>Qingkai Shi (The State Key Laboratory for Novel Software Technology, Nanjing University), Xiaoheng Xie (Ant Group), Xianjin Fu (Ant Group), Peng Di (Ant Group), Huawei Li (Alibaba Inc.), Ang Zhou (Ant Group), and Gang Fan (Ant Group)</i>	
GenC2Rust: Towards Generating Generic Rust Code from C	90
<i>Xiafa Wu (University of California, Irvine) and Brian Demsky (University of California, Irvine)</i>	
Instrumentation-Driven Evolution-Aware Runtime Verification	103
<i>Kevin Guan (Cornell University, USA) and Owolabi Legunsen (Cornell University, USA)</i>	
Moye: A Wallbreaker for Monolithic Firmware	116
<i>Jintao Huang (Institute of Information Engineering, CAS, China), Kai Yang (Guangxi University, China), Gaosheng Wang (Institute of Information Engineering, CAS, China), Zhiqiang Shi (Institute of Information Engineering, CAS, China), Zhiwen Pan (Institute of Information Engineering, CAS, China), Shichao Lv (Institute of Information Engineering, CAS, China), and Limin Sun (Institute of Information Engineering, CAS, China)</i>	
Understanding and Detecting Peer Dependency Resolving Loop in npm Ecosystem	129
<i>Xingyu Wang (Zhejiang University, China), Mingsen Wang (Zhejiang University, China), Wenbo Shen (Zhejiang University, China), and Rui Chang (Zhejiang University, China)</i>	

Testing and QA 1

Critical Variable State-Aware Directed Greybox Fuzzing	141
<i>Xu Chen (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China), Ningning Cui (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China), Zhe Pan (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China), Liwei Chen (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China), Gang Shi (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China), and Dan Meng (Institute of Information Engineering at Chinese Academy of Sciences, China / University of Chinese Academy of Sciences, China)</i>	

LWDIFF: An LLM-Assisted Differential Testing Framework for WebAssembly Runtimes	153
<i>Shiyao Zhou (The Hong Kong Polytechnic University, China), Jincheng Wang (The Hong Kong Polytechnic University, China), He Ye (University College London, United Kingdom), Hao Zhou (The Hong Kong Polytechnic University, China), Claire Le Goues (Carnegie Mellon University, United States), and Xiapu Luo (The Hong Kong Polytechnic University, China)</i>	
No Harness, No Problem: Oracle-guided Harnessing for Auto-generating C API Fuzzing Harnesses	165
<i>Stefan Nagy (University of Utah, USA) and Gabriel Sherman (University of Utah, USA)</i>	
Parametric Falsification of Many Probabilistic Requirements under Flakiness	178
<i>Matteo Camilli (Politecnico di Milano, Italy) and Raffaella Mirandola (Karlsruhe Institute of Technology (KIT), Germany)</i>	
REDII: Test Infrastructure to Enable Deterministic Reproduction of Failures for Distributed Systems	191
<i>Yang Feng (Nanjing University), Zhenyuan Lin (Nanjing University), Dongchen Zhao (Nanjing University), Mengbo Zhou (Nanjing University), Jia Liu (Nanjing University), and James A. Jones (University of California, Irvine)</i>	

AI for User Experience

Automated Generation of Accessibility Test Reports from Recorded User Transcripts	204
<i>Syed Fatiul Huq (University of California, Irvine, USA), Mahan Tafreshipour (University of California, Irvine, USA), Kate Kalceovich (Fable Tech Labs Inc., Canada), and Sam Malek (University of California, Irvine, USA)</i>	

Testing and Security

Fuzzing MLIR Compilers with Custom Mutation Synthesis	217
<i>Ben Limpanukorn (University of California, Los Angeles, USA), Jiyuan Wang (University of California, Los Angeles, USA), Hong Jin Kang (University of California, Los Angeles, USA), Zitong Zhou (University of California, Los Angeles, USA), and Miryung Kim (University of California, Los Angeles, USA)</i>	
InSVDF: Interface-State-Aware Virtual Device Fuzzing	230
<i>Zexiang Zhang (National University of Defense Technology, China), Gaoning Pan (Hangzhou Dianzi University, China), Ruipeng Wang (National University of Defense Technology, China), Yiming Tao (Zhejiang University, China), Zulie Pan (National University of Defense Technology, China), Cheng Tu (National University of Defense Technology, China), Min Zhang (National University of Defense Technology, China), Yang Li (National University of Defense Technology, China), Yi Shen (National University of Defense Technology, China), and Chunming Wu (Zhejiang University, China)</i>	

Reduce Dependence for Sound Concurrency Bug Prediction	242
<i>Shihao Zhu (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Yuqi Guo (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Yan Cai (Key Laboratory of System Software (Chinese Academy of Sciences) and State Key Laboratory of Computer Science, Institute of Software, Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Bin Liang (Renmin University of China, China), Long Zhang (National Intelligent Voice Innovation Center, Inspur Cloud Information Technology Co., Ltd., China), Rui Chen (Beijing Sunwise Information Technology Ltd., China), and Tingting Yu (Beijing Sunwise Information Technology Ltd., China)</i>	
SAND: Decoupling Sanitization from Fuzzing for Low Overhead	255
<i>Ziqiao Kong (Nanyang Technological University), Shaohua Li (The Chinese University of Hong Kong), Heqing Huang (City University of Hong Kong), and Zhendong Su (ETH Zurich)</i>	
TransferFuzz: Fuzzing with Historical Trace for Verifying Propagated Vulnerability Code	268
<i>Siyuan Li (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Yuekang Li (School of Computer Science and Engineering, The University of New South Wales, Sydney, Australia), Zuxin Chen (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Chaopeng Dong (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Yongpan Wang (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Hong Li (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China), Yongle Chen (College of Computer Science and Technology, Taiyuan University of Technology, Shanxi, China), and Hongsong Zhu (Institute of Information Engineering Chinese Academy of Sciences & University of Chinese Academy of Sciences, China)</i>	

AI for Analysis 1

A Multiple Representation Transformer with Optimized Abstract Syntax Tree for Efficient Code Clone Detection	281
<i>Tianchen Yu (School of Software Engineering, South China University of Technology), Li Yuan (School of Software Engineering, South China University of Technology), Liannan Lin (School of Software Engineering, South China University of Technology), and Hongkui He (School of Software Engineering, South China University of Technology)</i>	

Can an LLM find its way around a Spreadsheet?	294
<i>Cho-Ting Lee (Virginia Tech, USA), Andrew Neeser (Virginia Tech, USA), Shengzhe Xu (Virginia Tech, USA), Jay Katyan (Virginia Tech, USA), Patrick Cross (Virginia Tech, USA), Sharanya Pathakota (Virginia Tech, USA), Marigold Norman (World Forest ID, USA), John Simeone (Simeone Consulting, USA), Jaganmohan Chandrasekaran (Virginia Tech, USA), and Naren Ramakrishnan (Virginia Tech, USA)</i>	
QEDCartographer: Automating Formal Verification Using Reward-Free Reinforcement Learning .	307
<i>Alex Sanchez-Stern (University of Massachusetts, USA), Abhishek Varghese (University of Massachusetts, USA), Zhanna Zhanna Kaufman (University of Massachusetts, USA), Dylan Zhang (University of Illinois Urbana-Champaign, USA), Talia Ringer (University of Illinois Urbana-Champaign, USA), and Yuriy Brun (University of Massachusetts, USA)</i>	
TIGER: A Generating-Then-Ranking Framework for Practical Python Type Inference	321
<i>Chong Wang (Nanyang Technological University), Jian Zhang (Nanyang Technological University), Yiling Lou (Fudan University), Mingwei Liu (Sun Yat-sen University), Weisong Sun (Nanyang Technological University), Yang Liu (Nanyang Technological University), and Xin Peng (Fudan University)</i>	
ROCODE: Integrating Backtracking Mechanism and Program Analysis in Large Language Models for Code Generation	334
<i>Xue Jiang (Peking University, China), Yihong Dong (Peking University, China), Yongding Tao (University of Electronic Science and Technology of China, China), Huanyu Liu (Peking University, China), Zhi Jin (Peking University, China), and Ge Li (Peking University, China)</i>	
Rango: Adaptive Retrieval-Augmented Proving for Automated Software Verification	347
<i>Kyle Thompson (University of California at San Diego, USA), Nuno Saavedra (INESC-ID & IST, University of Lisbon, Portugal), Pedro Carrott (Imperial College London, United Kingdom), Kevin Fisher (University of California at San Diego, USA), Alex Sanchez-Stern (University of Massachusetts), Yuriy Brun (University of Massachusetts), João F. Ferreira (INESC-ID & IST, University of Lisbon, Portugal), Sorin Lerner (University of California at San Diego, USA), and Emily First (University of California, USA)</i>	

Autonomy

A Differential Testing Framework to Identify Critical AV Failures Leveraging Arbitrary Inputs	360
<i>Trey Woodlief (University of Virginia), Carl Hildebrandt (University of Virginia), and Sebastian Elbaum (University of Virginia)</i>	
Automating a Complete Software Test Process Using LLMs: An Automotive Case Study	373
<i>Shuai Wang (Chalmers University of Technology, Sweden), Yinan Yu (Chalmers University of Technology, Sweden), Robert Feldt (Chalmers University of Technology, Sweden), and Dhasarathy Parthasarathy (Volvo Group, Sweden)</i>	

LLM-Agents Driven Automated Simulation Testing and Analysis of small Uncrewed Aerial Systems	385
<i>Venkata Sai Aswath Duvvuru (Saint Louis University, USA), Bohan Zhang (Saint Louis University, USA), Michael Vierhuaser (University of Innsbruck, Austria), and Ankit Agrawal (Saint Louis University, USA)</i>	
Efficient Domain Augmentation for Autonomous Driving Testing Using Diffusion Models	398
<i>Luciano Baresi (Politecnico di Milano, Italy), Davide Yi Xian Hu (Politecnico di Milano, Italy), Andrea Stocco (Technical University of Munich and fortiss GmbH, Germany), and Paolo Tonella (Università della Svizzera italiana)</i>	
GARL: Genetic Algorithm-Augmented Reinforcement Learning to Detect Violations in Marker-Based Autonomous Landing Systems	411
<i>Linfeng Liang (Macquarie University), Yao Deng (Macquarie University), Kye Morton (Skyy Network), Valtteri Kallinen (Skyy Network), Alice James (Macquarie University), Avishkar Seth (Macquarie University), Endrowednes Kuantama (Macquarie University), Subhas Mukhopadhyay (Macquarie University), Richard Han (Macquarie University), and Xi Zheng (Macquarie University)</i>	
Decictor: Towards Evaluating the Robustness of Decision-Making in Autonomous Driving Systems	424
<i>Mingfei Cheng (Singapore Management University, Singapore), Xiaofei Xie (Singapore Management University, Singapore), Yuan Zhou (Zhejiang Sci-Tech University, China), Junjie Wang (Tianjin University, China), Guozhu Meng (Chinese Academy of Sciences, China), and Kairui Yang (Alibaba Group, China)</i>	

AI for Testing and QA 1

Does GenAI Make Usability Testing Obsolete?	437
<i>Ali Ebrahimi Pourasad (University of Hamburg) and Walid Maalej (University of Hamburg)</i>	
Feature-Driven End-To-End Test Generation	450
<i>Parsa Alian (University of British Columbia, Canada), Noor Nashid (University of British Columbia, Canada), Mobina Shahbandeh (University of British Columbia, Canada), Taha Shabani (University of British Columbia, Canada), and Ali Mesbah (University of British Columbia, Canada)</i>	
SeeAction: Towards Reverse Engineering How-What-Where of HCI Actions from Screenshots for UI Automation	463
<i>Dehai Zhao (CSIRO's Data61, Australia), Zhenchang Xing (CSIRO's Data61, Australia), Qinghua Lu (CSIRO's Data61, Australia), Xiwei Xu (CSIRO's Data61, Australia), and Liming Zhu (CSIRO's Data61 & School of CSE, UNSW, Australia)</i>	
Synthesizing Document Database Queries using Collection Abstractions	476
<i>Qikang Liu (Simon Fraser University), Yang He (Simon Fraser University), Yanwen Cai (Simon Fraser University), Byeongguk Kwak (Simon Fraser University), and Yuepeng Wang (Simon Fraser University)</i>	

The Power of Types: Exploring the Impact of Type Checking on Neural Bug Detection in Dynamically Typed Languages	489
<i>Boqi Chen (McGill University), José Antonio Hernández López (Linköping University), Gunter Mussbacher (McGill University), and Dániel Varró (Linköping University)</i>	

SE for AI 1

A Test Oracle for Reinforcement Learning Software based on Lyapunov Stability Control Theory	502
<i>Shiyu Zhang (The Hong Kong Polytechnic University, Hong Kong), Haoyang Song (The Hong Kong Polytechnic University, Hong Kong), Qixin Wang (The Hong Kong Polytechnic University, Hong Kong), Henghua Shen (The Hong Kong Polytechnic University, Hong Kong), and Yu Pei (The Hong Kong Polytechnic University, Hong Kong)</i>	
CodeImprove: Program Adaptation for Deep Code Models	514
<i>Ravishka Rathnasuriya (University of Texas at Dallas, USA), Zijie Zhao (University of Pennsylvania, USA), and Wei Yang (University of Texas at Dallas, USA)</i>	
FairQuant: Certifying and Quantifying Fairness of Deep Neural Networks	527
<i>Brian Hyeongseok Kim (University of Southern California, USA), Jingbo Wang (Purdue University, USA), and Chao Wang (University of Southern California, USA)</i>	

AI for SE 1

Calibration and Correctness of Language Models for Code	540
<i>Claudio Spiess (UC Davis), David Gros (UC Davis), Kunal Suresh Pai (UC Davis), Michael Pradel (Univ. of Stuttgart), Md Rafiqul Islam Rabin (Univ. of Houston), Amin Alipour (Univ. of Houston), Susmit Jha (SRI), Prem Devanbu (UC Davis), and Toufique Ahmed (UC Davis)</i>	
An Empirical Study on Commit Message Generation using LLMs via In-Context Learning	553
<i>Yifan Wu (Peking University, China), Yunpeng Wang (Ant Group, China), Ying Li (Peking University, China), Wei Tao (Fudan University, China), Siyu Yu (Peking University, China), Haowen Yang (The Chinese University of Hong Kong, Shenzhen (CUHK-Shenzhen), China), Wei Jiang (Ant Group, China), and Jianguo Li (Ant Group, China)</i>	
Instruct or Interact? Exploring and Eliciting LLMs' Capability in Code Snippet Adaptation Through Prompt Engineering	566
<i>Tanghaoran Zhang (National University of Defense Technology, China), Yue Yu (National University of Defense Technology, China), Xinjun Mao (National University of Defense Technology, China), Shangwen Wang (National University of Defense Technology, China), Kang Yang (National University of Defense Technology, China), Yao Lu (National University of Defense Technology, China), Zhang Zhang (National University of Defense Technology, China), and Yuxin Zhao (National University of Defense Technology, China)</i>	

Search-Based LLMs for Code Optimization	578
<i>Shuzheng Gao (The Chinese University of Hong Kong), Cuiyun Gao (Harbin Institute of Technology), Wenchao Gu (The Chinese University of Hong Kong), and Michael Lyu (The Chinese University of Hong Kong)</i>	
Towards Better Answers: Automated Stack Overflow Post Updating	591
<i>Yubo Mai (Zhejiang University), Zhipeng Gao (Shanghai Institute for Advanced Study of Zhejiang University), Haoye Wang (Hangzhou City University), Tingting Bi (University of Western Australia), Xing Hu (Zhejiang University), Xin Xia (Zhejiang University), and Jianling Sun (Zhejiang University)</i>	
Unseen Horizons: Unveiling the Real Capability of LLM Code Generation Beyond the Familiar	604
<i>Yuanliang Zhang (National University of Defense Technology), Yifan Xie (National University of Defense Technology), Shanshan Li (National University of Defense Technology), Ke Liu (National University of Defense Technology), Chong Wang (National University of Defense Technology), Zhouyang Jia (National University of Defense Technology), Xiangbing Huang (National University of Defense Technology), Jie Song (National University of Defense Technology), Chaopeng Luo (National University of Defense Technology), Zhizheng Zheng (National University of Defense Technology), Rulin Xu (National University of Defense Technology), Yitong Liu (National University of Defense Technology), Si Zheng (National University of Defense Technology), and Xiangke Liao (National University of Defense Technology)</i>	

Formal Methods 2

ConsCS: Effective and Efficient Verification of Circom Circuits	616
<i>Jinan Jiang (The Hong Kong Polytechnic University, China), Xinghao Peng (The Hong Kong Polytechnic University, China), Jinzhao Chu (The Hong Kong Polytechnic University, China), and Xiapu Luo (The Hong Kong Polytechnic University, China)</i>	
Constrained LTL Specification Learning from Examples	629
<i>Changjian Zhang (Carnegie Mellon University, USA), Parv Kapoor (Carnegie Mellon University, USA), Ian Dardik (Carnegie Mellon University, USA), Leyi Cui (Columbia University, USA), Romulo Meira-Goes (The Pennsylvania State University, USA), David Garlan (Carnegie Mellon University, USA), and Eunsuk Kang (Carnegie Mellon University, USA)</i>	
LLM-aided Automatic Modelling for Security Protocol Verification	642
<i>Ziyu Mao (Zhejiang University, China), Jingyi Wang (Zhejiang University, China), Jun Sun (Singapore Management University, Singapore), Shengchao Qin (Xidian University), and Jiawen Xiong (East China Normal University)</i>	

Databases and Business

Thanos: DBMS Bug Detection via Storage Engine Rotation Based Differential Testing	655
<i>Ying Fu (National University of Defense Technology, China), Zhiyong Wu (Tsinghua University, China), Yuanliang Zhang (National University of Defense Technology, China), Jie Liang (Tsinghua University, China), Jingzhou Fu (Tsinghua University, China), Yu Jiang (Tsinghua University, China), Shanshan Li (National University of Defense Technology, China), and Xiangke Liao (National University of Defense Technology, China)</i>	
Coni: Detecting Database Connector Bugs via State-Aware Test Case Generation	667
<i>Wenqian Deng (Tsinghua University, China), Jie Liang (Tsinghua University, China), Zhiyong Wu (Tsinghua University, China), Jingzhou Fu (Tsinghua University, China), Mingzhe Wang (Tsinghua University, China), and Yu Jiang (Tsinghua University, China)</i>	
PUPPY: Finding Performance Degradation Bugs in DBMSs via Limited-Optimization Plan Construction	679
<i>Zhiyong Wu (Tsinghua University), Jie Liang (Tsinghua University), Jingzhou Fu (Tsinghua University), Mingzhe Wang (Tsinghua University), and Yu Jiang (Tsinghua University)</i>	

Program Comprehension 2

Enhancing Fault Localization in Industrial Software Systems via Contrastive Learning	691
<i>Chun Li (Nanjing University, China), Hui Li (Samsung Electronics (China) R&D Centre, China), Zhong Li (Nanjing University, China), Minxue Pan (Nanjing University, China), and Xuandong Li (Nanjing University, China)</i>	

Human and Social Process 2

Who's Pushing the Code? An Exploration of GitHub Impersonation	704
<i>Yueke Zhang (Vanderbilt University, USA), Anda Liang (Vanderbilt University, USA), Xiaohan Wang (Vanderbilt University, USA), Pamela Wisniewski (Vanderbilt University, USA), Fengwei Zhang (Southern University of Science and Technology, China), Kevin Leach (Vanderbilt University, USA), and Yu Huang (Vanderbilt University, USA)</i>	
Investigating the Impact of Interpersonal Challenges on Feeling Welcome in OSS	717
<i>Bianca Trinkenreich (Colorado State University), Zixuan Feng (Oregon State University), Rudrajit Choudhuri (Oregon State University), Marco Gerosa (Northern Arizona University), Anita Sarma (Oregon State University), and Igor Steinmacher (Northern Arizona University)</i>	

SE for AI with Security

Understanding the Effectiveness of Coverage Criteria for Large Language Models: A Special Angle from Jailbreak Attacks	730
<i>Shide Zhou (Huazhong University of Science and Technology), Tianlin Li (Nanyang Technological University), Kailong Wang (Huazhong University of Science and Technology), Yihao Huang (Nanyang Technological University), Ling Shi (Nanyang Technological University), Yang Liu (Nanyang Technological University), and Haoyu Wang (Huazhong University of Science and Technology)</i>	
Diversity Drives Fairness: Ensemble of Higher Order Mutants for Intersectional Fairness of Machine Learning Software	743
<i>Zhenpeng Chen (Nanyang Technological University, Singapore), Xinyue Li (Peking University, China), Jie M. Zhang (King's College London, United Kingdom), Federica Sarro (University College London, United Kingdom), and Yang Liu (Nanyang Technological University, Singapore)</i>	
HIFI: Explaining and Mitigating Algorithmic Bias through the Lens of Game-Theoretic Interactions	756
<i>Lingfeng Zhang (East China Normal University, China), Zhaohui Wang (East China Normal University, China), Yueling Zhang (East China Normal University, China), Min Zhang (East China Normal University, China), and Jiangtao Wang (East China Normal University, China)</i>	
Towards More Trustworthy Deep Code Models by Enabling Out-of-Distribution Detection	769
<i>Yanfu Yan (William & Mary), Viet Duong (William & Mary), Huajie Shao (William & Mary), and Denys Poshyvanyk (William & Mary)</i>	
FairSense: Long-Term Fairness Analysis of ML-Enabled Systems	782
<i>Yining She (Carnegie Mellon University), Sumon Biswas (Case Western Reserve University), Christian Kästner (Carnegie Mellon University), and Eunsuk Kang (Carnegie Mellon University)</i>	

Requirements

A Little Goes a Long Way: Tuning Configuration Selection for Continuous Kernel Fuzzing	795
<i>Sanan Hasanov (University of Central Florida, USA), Stefan Nagy (University of Utah, USA), and Paul Gazzillo (University of Central Florida, USA)</i>	
Exploring the Robustness of the Effect of EVO on Intention Valuation through Replication	808
<i>Yesugen Baartartogtokh (University of Massachusetts, USA), Kaitlyn Cook (Smith College, USA), and Alicia M. Grubb (Smith College, USA)</i>	
Unavoidable Boundary Conditions: A Control Perspective on Goal Conflicts	821
<i>Francisco Cirelli (Universidad de Buenos Aires, Argentina), Dalal Alrajeh (Imperial College London), and Sebastian Uchitel (CONICET/U. de Buenos Aires, Argentina Imperial College London)</i>	
User Personas Improve Social Sustainability by Encouraging Software Developers to Deprioritize Antisocial Features	833
<i>Bimpe Ayoola (Dalhousie University, Canada), Miikka Kuutila (Dalhousie University, Canada), Rina R. Wehbe (Dalhousie University, Canada), and Paul Ralph (Dalhousie University, Canada)</i>	

AI for Analysis 2

Neurosymbolic Modular Refinement Type Inference	846
<i>Georgios Sakkas (University of California San Diego, USA), Pratyush Sahu (University of California San Diego, USA), Kyeling Ong (University of California San Diego, USA), and Ranjit Jhala (University of California San Diego, USA)</i>	
An Empirical Study on Automatically Detecting AI-Generated Source Code: How Far Are We?	859
<i>Hyunjae Suh (University of California, Irvine), Mahan Tafreshipour (University of California, Irvine), Jiawei Li (University of California, Irvine), Adithya Bhattiprolu (University of California, Irvine), and Iftekhar Ahmed (University of California, Irvine)</i>	
Planning a Large Language Model for Static Detection of Runtime Errors in Code Snippets	872
<i>Smit Patel (The University of Texas at Dallas, USA), Aashish Yadavally (The University of Texas at Dallas, USA), Hridya Dhulipala (The University of Texas at Dallas, USA), and Tien Nguyen (The University of Texas at Dallas, USA)</i>	
LLMs Meet Library Evolution: Evaluating Deprecated API Usage in LLM-based Code Completion	885
<i>Chong Wang (Nanyang Technological University), Kaifeng Huang (Tongji University), Jian Zhang (Nanyang Technological University), Yebo Feng (Nanyang Technological University), Lyuye Zhang (Nanyang Technological University), Yang Liu (Nanyang Technological University), and Xin Peng (Fudan University)</i>	
Knowledge-Enhanced Program Repair for Data Science Code	898
<i>Shuyin Ouyang (King's College London), Jie Zhang (King's College London), Zeyu Sun (Institute of Software, Chinese Academy of Sciences), and Albert Merono Penuela (King's College London)</i>	

AI for Program Comprehension 1

ADAMAS: Adaptive Domain-Aware Performance Anomaly Detection in Cloud Service Systems ..	911
<i>Wenwei Gu (The Chinese University of Hong Kong), Jiazhen Gu (The Chinese University of Hong Kong), Jinyang Liu (The Chinese University of Hong Kong), Zhuangbin Chen (Sun Yat-sen University), Jianping Zhang (The Chinese University of Hong Kong), Jinxi Kuang (The Chinese University of Hong Kong), Cong Feng (Huawei Cloud Computing Technology Co., Ltd), Yongqiang Yang (Huawei Cloud Computing Technology Co., Ltd), and Michael R. Lyu (The Chinese University of Hong Kong)</i>	
LibreLog: Accurate and Efficient Unsupervised Log Parsing Using Open-Source Large Language Models	924
<i>Zeyang Ma (Concordia University, Canada), Dong Jae Kim (DePaul University), and Tse-Hsun Chen (Concordia University, Canada)</i>	

Model Editing for LLMs4Code: How Far are We?	937
<i>Xiaopeng Li (National University of Defense Technology), Shangwen Wang (National University of Defense Technology), Shasha Li (National University of Defense Technology), Jun Ma (National University of Defense Technology), Jie Yu (National University of Defense Technology), Xiaodong Liu (National University of Defense Technology), Wang Jing (National University of Defense Technology), Bin Ji (National University of Defense Technology), and Weimin Zhang (National University of Defense Technology)</i>	
Software Model Evolution with Large Language Models: Experiments on Simulated, Public, and Industrial Datasets	950
<i>Christof Tinnes (Siemens AG), Alisa Welter (Saarland University, Saarland Informatics Campus), and Sven Apel (Saarland University, Saarland Informatics Campus)</i>	
SpecRover: Code Intent Extraction via LLMs	963
<i>Haifeng Ruan (National University of Singapore, Singapore), Yuntong Zhang (National University of Singapore, Singapore), and Abhik Roychoudhury (National University of Singapore, Singapore)</i>	
Unleashing the True Potential of Semantic-based Log Parsing with Pre-trained Language Models	975
<i>Van-Hoang Le (The University of Newcastle, Australia), Hongyu Zhang (Chongqing University, China), and Yi Xiao (Chongqing University, China)</i>	

AI for Testing and QA 2

Faster Configuration Performance Bug Testing with Neural Dual-level Prioritization	988
<i>Youpeng Ma (School of Computer Science and Engineering, University of Electronic Science and Technology of China), Tao Chen (School of Computer Science, University of Birmingham), and Ke Li (University of Exeter)</i>	
Metamorphic-Based Many-Objective Distillation of LLMs for Code-related Tasks	1001
<i>Annibale Panichella (Delft University of Technology)</i>	
NIODEbugger: A Novel Approach to Repair Non-Idempotent-Outcome Tests with LLM-Based Agent	1014
<i>Kaiyao Ke (University of Illinois Urbana-Champaign, USA)</i>	
Test Intention Guided LLM-based Unit Test Generation	1026
<i>Zifan Nan (Huawei), Zhaoqiang Guo (Huawei), Kui Liu (Huawei), and Xin Xia (Huawei)</i>	
What You See Is What You Get: Attention-based Self-guided Automatic Unit Test Generation	1039
<i>Xin Yin (Zhejiang University, China), Chao Ni (Zhejiang University, China), Xiaodan Xu (Zhejiang University, China), and Xiaohu Yang (Zhejiang University, China)</i>	

Analysis 1

An Empirical Study on Reproducible Packaging in Open-Source Ecosystems	1052
<i>Giacomo Benedetti (University of Genoa, Italy), Oreofe Solarin (Case Western Reserve University, USA), Courtney Miller (Carnegie Mellon University, USA), Greg Tystahl (North Carolina State University, USA), William Enck (North Carolina State University, USA), Christian Kaestner (Carnegie Mellon University), Alexandros Kapravelos (North Carolina State University, USA), Alessio Merlo (CASD - School of Advanced Defense Studies, Italy), and Luca Verderame (University of Genoa, Italy)</i>	
An Extensive Empirical Study of Nondeterministic Behavior in Static Analysis Tools	1064
<i>Miao Miao (University of Texas at Dallas, USA), Austin Mordahl (University of Texas at Dallas, USA), Dakota Soles (University of Texas at Dallas, USA), Alice Beideck (University of Texas at Dallas, USA), and Shiyi Wei (University of Texas at Dallas, USA)</i>	
Execution Trace Reconstruction Using Diffusion-Based Generative Models	1077
<i>Madeline Janecek (Brock University), Naser Ezzati-Jivan (Brock University), and Abdelwahab Hamou-Lhadj (Concordia University)</i>	
Interactive Cross-Language Pointer Analysis For Resolving Native Code in Java Programs	1089
<i>Chenxi Zhang (State Key Laboratory for Novel Software Technology, China), Yufei Liang (State Key Laboratory for Novel Software Technology, China), Tian Tan (State Key Laboratory for Novel Software Technology, China), Chang Xu (State Key Laboratory for Novel Software Technology, China), Shuangxiang Kan (University of New South Wales, Australia), Yulei Sui (University of New South Wales, Australia), and Yue Li (State Key Laboratory for Novel Software Technology, China)</i>	
Static Analysis of Remote Procedure Call in Java Programs	1101
<i>Baoquan Cui (Institute of Software Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Rong Qu (Institute of Software Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), Zhen Tang (Institute of Software Chinese Academy of Sciences, University of Chinese Academy of Sciences, China), and Jian Zhang (Institute of Software Chinese Academy of Sciences, University of Chinese Academy of Sciences, China)</i>	

AI for SE 2

Large Language Models for Safe Minimization	1114
<i>Aashish Yadavally (The University of Texas at Dallas, USA), Xiaokai Rong (The University of Texas at Dallas, USA), Phat Nguyen (The University of Texas at Dallas, USA), and Tien Nguyen (The University of Texas at Dallas, USA)</i>	
Intention is All You Need: Refining Your Code from Your Intention	1127
<i>Qi Guo (Tianjin University), Xiaofei Xie (Singapore Management University), Shangqing Liu (Nanyang Technological University), Ming Hu (Singapore Management University), Xiaohong Li (Tianjin University), and Lei Bu (Nanjing University)</i>	

RLCoder: Reinforcement Learning for Repository-Level Code Completion	1140
<i>Yanlin Wang (Sun Yat-sen University), Yanli Wang (Sun Yat-sen University), Daya Guo (Sun Yat-sen University), Jiachi Chen (Sun Yat-sen University), Ruikai Zhang (Huawei Cloud Computing Technologies Co., Ltd.), Yuchi Ma (Huawei Cloud Computing Technologies Co., Ltd.), and Zibin Zheng (Sun Yat-sen University)</i>	
InterTrans: Leveraging Transitive Intermediate Translations to Enhance LLM-based Code Translation	1153
<i>Marcos Macedo (Queen's University, Canada), Yuan Tian (Queen's University, Canada), Pengyu Nie (University of Waterloo, Canada), Filipe R. Cogo (Centre for Software Excellence - Huawei, Canada), and Bram Adams (Queen's University, Canada)</i>	

Design for AI

A Large-Scale Study of Model Integration in ML-Enabled Software Systems	1165
<i>Yorick Sens (Ruhr University Bochum, Germany), Henriette Knopp (Ruhr University Bochum, Germany), Sven Peldszus (Ruhr University Bochum, Germany), and Thorsten Berger (Ruhr University Bochum, Germany and Chalmers University of Gothenburg, Sweden)</i>	
Are LLMs Correctly Integrated into Software Systems?	1178

Human and Social 4

Accessibility Issues in Ad-Driven Web Applications	2393
<i>Abdul Haddi Amjad (Virginia Tech, USA), Muhammad Danish (Virginia Tech, USA), Bless Jah (Virginia Tech, USA), and Muhammad Ali Gulzar (Virginia Tech, USA)</i>	

User Experience

Unveiling the Energy Vampires: A Methodology for Debugging Software Energy Consumption ..	2406
<i>Enrique Barba Roque (Delft University of Technology, The Netherlands), Luis Cruz (Delft University of Technology, The Netherlands), and Thomas Durieux (Delft University of Technology, The Netherlands)</i>	

Security and Analysis 3

Automated, Unsupervised, and Auto-parameterized Inference of Data Patterns and Anomaly Detection	2419
<i>Qiaolin Qin (Polytechnique Montreal), Heng Li (Polytechnique Montreal), Ettore Merlo (Polytechnique Montreal), and Maxime Lamothe (Polytechnique Montreal)</i>	
On Prescription or Off Prescription? An Empirical Study of Community-prescribed Security Configurations for Kubernetes	2432
<i>Shazibul Islam Shamim (Kennesaw State University), Hanyang Hu (Company-A), and Akond Rahman (Auburn University)</i>	
Similar but Patched Code Considered Harmful -- The Impact of Similar but Patched Code on Recurring Vulnerability Detection and How to Remove Them	2445
<i>Zixuan Tan (Zhejiang University), Jiayuan Zhou (Centre for Software Excellence, Huawei), Xing Hu (Zhejiang University), Shengyi Pan (Zhejiang University), Kui Liu (Huawei), and Xin Xia (Huawei)</i>	
TIVER: Identifying Adaptive Versions of C/C++ Third-Party Open-Source Components Using a Code Clustering Technique	2458
<i>Youngjae Choi (Korea University) and Seunghoon Woo (Korea University)</i>	

Design and Architecture 2

An Exploratory Study on the Engineering of Security Features	2470
<i>Kevin Hermann (Ruhr University Bochum), Sven Peldszus (Ruhr University Bochum), Jan-Philipp Steghöfer (XITASO GmbH), and Thorsten Berger (Ruhr University Bochum, Chalmers University of Gothenburg)</i>	

DesignRepair: Dual-Stream Design Guideline-Aware Frontend Repair with Large Language Models	2483
<i>Mingyue Yuan (University of New South Wales, CSIRO's Data61), Jieshan Chen (CSIRO's Data61, Technical University of Munich), Zhenchang Xing (CSIRO's Data61, Australian National University), Aaron Quigley (CSIRO's Data61, University of New South Wales), Yuyu Luo (The Hong Kong University of Science and Technology (Guangzhou)), Tianqi Luo (The Hong Kong University of Science and Technology (Guangzhou)), Gelareh Mohammadi (University of New South Wales), Qinghua Lu (CSIRO's Data61, University of New South Wales), and Liming Zhu (CSIRO's Data61, University of New South Wales)</i>	
Fidelity of Cloud Emulators: The Imitation Game of Testing Cloud-based Software	2495
<i>Anna Mazhar (Cornell University, USA), Saad Sher Alam (University of Illinois Urbana-Champaign, USA), William X. Zheng (University of Illinois Urbana-Champaign, USA), Yinfang Chen (University of Illinois Urbana-Champaign, USA), Suman Nath (Microsoft Research, USA), and Tianyin Xu (University of Illinois Urbana-Champaign, USA)</i>	
Formally Verified Cloud-Scale Authorization	2508
<i>Aleks Chakarov (Amazon), Jaco Geldenhuys (Amazon), Matthew Heck (Amazon), Michael Hicks (Amazon), Sam Huang (Amazon), Georges-Axel Jaloyan (Amazon), Anjali Joshi (Amazon), K. Rustan M. Leino (Amazon), Mikael Mayer (Amazon), Sean McLaughlin (Amazon), Akhilesh Mritunjai (Amazon), Clement Pit-Claudel (Amazon), Sorawee Porncharoenwase (Amazon), Florian Rabe (Amazon), Marianna Rapoport (Amazon), Giles Reger (Amazon), Cody Roux (Amazon), Neha Rungta (Amazon), Robin Salkeld (Amazon), Matthias Schlaipfer (Amazon), Daniel Schoepe (Amazon), Johanna Schwartzentruber (Amazon), Serdar Tasiran (Amazon), Aaron Tomb (Amazon), Emina Torlak (Amazon), Jean-Baptiste Tristan (Amazon), Lucas Wagner (Amazon), Michael W. Whalen (Amazon), Remy Willems (Amazon), Tongtong Xiang (Amazon), Tae Joon Byun (Meta), Joshua Cohen (Princeton University), Ruijie Fang (University of Texas at Austin), Junyoung Jang (McGill University), Jakob Rath (TU Wien), Hira Taqdees Syeda (University of Melbourne), Dominik Wagner (NTU Singapore), and Yongwei Yuan (Purdue University)</i>	
The Same Only Different: On Information Modality for Configuration Performance Analysis	2522
<i>Hongyuan Liang (School of Computer Science and Engineering, University of Electronic Science and Technology of China, China), Yue Huang (School of Computer Science and Engineering, University of Electronic Science and Technology of China, China), and Tao Chen (School of Computer Science, University of Birmingham, United Kingdom)</i>	

AI for Analysis 5

3DGen: AI-Assisted Generation of Provably Correct Binary Format Parsers	2535
<i>Sarah Fakhoury (Microsoft Research), Markus Kuppe (Microsoft Research), Shuvendu Lahiri (Microsoft Research), Tahina Ramananandro (Microsoft Research), and Nikhil Swamy (Microsoft Research)</i>	

Aligning the Objective of LLM-based Program Repair	2548
<i>Junjielong Xu (The Chinese University of Hong Kong, Shenzhen, China), Ying Fu (Chongqing University, China), Shin Hwei Tan (Concordia University, Canada), and Pinjia He (The Chinese University of Hong Kong, Shenzhen, China)</i>	
Revisiting Unnaturalness for Automated Program Repair in the Era of Large Language Models ..	2561
<i>Aidan Z.H. Yang (Carnegie Mellon University), Sophia Kolak (Carnegie Mellon University), Vincent Hellendoorn (Carnegie Mellon University), Ruben Martins (Carnegie Mellon University), and Claire Le Goues (Carnegie Mellon University)</i>	
The Fact Selection Problem in LLM-Based Program Repair	2574
<i>Nikhil Parasaram (University College London), Huijie Yan (University College London), Boyu Yang (University College London), Zineb Flahy (University College London), Abriele Qudsi (University College London), Damian Ziaber (University College London), Earl Barr (University College London), and Sergey Mechtaev (Peking University)</i>	
Towards Understanding the Characteristics of Code Generation Errors Made by Large Language Models	2587
<i>Zhijie Wang (University of Alberta, Canada), Zijie Zhou (University of Illinois Urbana-Champaign, USA), Da Song (University of Alberta, Canada), Yuheng Huang (The University of Tokyo, Japan), Shengmai Chen (Purdue University, USA), Lei Ma (The University of Tokyo, Japan; University of Alberta, Canada), and Tianyi Zhang (Purdue University, USA)</i>	

AI for Security 2

Repository-Level Graph Representation Learning for Enhanced Security Patch Detection	2600
<i>Xin-cheng Wen (Harbin Institute of Technology (Shenzhen), China), Zirui Lin (Harbin Institute of Technology (Shenzhen), China), Cuiyun Gao (Harbin Institute of Technology (Shenzhen), China), Hongyu Zhang (Chongqing University, China), Yong Wang (Anhui Polytechnic University, China), and Qing Liao (Harbin Institute of Technology (Shenzhen), China)</i>	
FAMOS: Fault diagnosis for Microservice Systems through Effective Multi-modal Data Fusion	2613
<i>Chiming Duan (Peking University, China), Yong Yang (Peking University, China), Tong Jia (Peking University, China), Guiyang Liu (Alibaba Group, China), Jinbu Liu (Alibaba Group, China), Huxing Zhang (Alibaba Group, China), Qi Zhou (Alibaba Group, China), Ying Li (Peking University, China), and Gang Huang (Peking University, China)</i>	
Leveraging Large Language Models to Detect npm Malicious Packages	2625
<i>Nusrat Zahan (North Carolina State University), Philipp Burckhardt (Socket, Inc), Mikola Lysenko (Socket, Inc), Feross Aboukhadijeh (Socket, Inc), and Laurie Williams (North Carolina State University)</i>	

Magika: AI-Powered Content-Type Detection	2638
<i>Yanick Fratantonio (Google), Luca Invernizzi (Google), Loua Farah (Google), Kurt Thomas (Google), Marina Zhang (Google), Ange Albertini (Google), Francois Galilee (Google), Giancarlo Metitieri (Google), Julien Cretin (Google), Alex Petit-Bianco (Google), David Tao (Google), and Elie Bursztein (Google)</i>	
Closing the Gap: A User Study on the Real-world Usefulness of AI-powered Vulnerability Detection & Repair in the IDE	2650
<i>Benjamin Steenhoek (Iowa State University), Kalpathy Sivaraman (Microsoft), Renata Saldivar Gonzalez (Microsoft), Yevhen Mohylevskyy (Microsoft), Roshanak Zilouchian Moghaddam (Microsoft), and Wei Le (Iowa State University)</i>	
Show Me Your Code! Kill Code Poisoning: A Lightweight Method Based on Code Naturalness ...	2663
<i>Weisong Sun (College of Computing and Data Science, Nanyang Technological University, Singapore), Yuchen Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China), Mengzhe Yuan (State Key Laboratory for Novel Software Technology, Nanjing University, China), Chunrong Fang (State Key Laboratory for Novel Software Technology, Nanjing University, China), Zhenpeng Chen (College of Computing and Data Science, Nanyang Technological University, Singapore), Chong Wang (College of Computing and Data Science, Nanyang Technological University, Singapore), Yang Liu (College of Computing and Data Science, Nanyang Technological University, Singapore), Baowen Xu (State Key Laboratory for Novel Software Technology, Nanjing University, China), and Zhenyu Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China)</i>	

AI for Testing and QA 6

Treefix: Enabling Execution with a Tree of Prefixes	2676
<i>Beatriz Souza (University of Stuttgart) and Michael Pradel (University of Stuttgart)</i>	

Process

Automated Accessibility Analysis of Dynamic Content Changes on Mobile Apps	2689
<i>Forough Mehralian (University of California, Irvine, USA), Ziyao He (University of California, Irvine, USA), and Sam Malek (University of California, Irvine, USA)</i>	

Testing and QA 6

JANUS: Detecting Rendering Bugs in Web Browsers via Visual Delta Consistency	2702
<i>Chijin Zhou (Tsinghua University), Quan Zhang (Tsinghua University), Bingzhou Qian (National University of Defense Technology), and Yu Jiang (Tsinghua University)</i>	

Human and Social for AI

ChatGPT-Based Test Generation for Refactoring Engines Enhanced by Feature Analysis on Examples	2714
<i>Chunhao Dong (Beijing Institute of Technology), Yanjie Jiang (Peking University), Yuxia Zhang (Beijing Institute of Technology), Yang Zhang (Hebei University of Science and Technology), and Liu Hui (Beijing Institute of Technology)</i>	
Navigating the Testing of Evolving Deep Learning Systems: An Exploratory Interview Study	2726
<i>Hanmo You (College of Intelligence and Computing, Tianjin University), Zan Wang (College of Intelligence and Computing, Tianjin University), Bin Lin (Hangzhou Dianzi University), and Junjie Chen (College of Intelligence and Computing, Tianjin University)</i>	

Mobile Software

EP-Detector: Automatic Detection of Error-prone Operation Anomalies in Android Applications	2739
<i>Chenkai Guo (College of Cyber Science, Nankai University, China; Haihe Lab of ITAI, China; Anhui Province Key Laboratory of Cyberspace Security Situation Awareness and Evaluation, China), Qianlu Wang (College of Cyber Science, Nankai University, China), Naipeng Dong (The University of Queensland, Australia), Lingling Fan (College of Cyber Science, Nankai University, China), Tianhong Wang (College of Computer Science, Nankai University, China), Weijie Zhang (College of Computer Science, Nankai University, China), Enbao Chen (College of Cyber Science, Nankai University, China), Zheli Liu (College of Cyber Science, Nankai University, China), and Lu Yu (National University of Defense Technology, China; Anhui Province Key Laboratory of Cyberspace Security Situation Awareness and Evaluation, China)</i>	
Mobile Application Coverage: The 30% Curse and Ways Forward	2751
<i>Faridah Akinotcho (The University of British Columbia, Canada), Lili Wei (McGill University, Canada), and Julia Rubin (The University of British Columbia, Canada)</i>	
The Design Smells Breaking the Boundary between Android Variants and AOSP	2764
<i>Wuxia Jin (Xi'an Jiaotong University, China), Jiaowei Shang (Xi'an Jiaotong University, China), Jianguo Zheng (Xi'an Jiaotong University, China), Mengjie Sun (Xi'an Jiaotong University, China), Zhenyu Huang (Honor Device Co., Ltd., China), Ming Fan (Xi'an Jiaotong University, China), and Ting Liu (Xi'an Jiaotong University, China)</i>	
Scenario-Driven and Context-Aware Automated Accessibility Testing for Android Apps	2777
<i>Yuxin Zhang (College of Intelligence and Computing, Tianjin University), Sen Chen (College of Intelligence and Computing, Tianjin University), Xiaofei Xie (Singapore Management University), Zibo Liu (College of Intelligence and Computing, Tianjin University), and Lingling Fan (Nankai University)</i>	

TacDroid: Detection of Illicit Apps through Hybrid Analysis of UI-based Transition Graphs	2790
<i>Yanchen Lu (Zhejiang University, China), Hongyu Lin (Zhejiang University, China), Zehua He (Zhejiang University, China), Haitao Xu (Zhejiang University, China), Zhao Li (Hangzhou Yugu Technology, China), Shuai Hao (Old Dominion University, USA), Liu Wang (Beijing University of Posts and Telecommunications, China), Haoyu Wang (Huazhong University of Science and Technology, China), and Kui Ren (Zhejiang University, China)</i>	
PacDroid: A Pointer-Analysis-Centric Framework for Security Vulnerabilities in Android Apps	2803
<i>Menglong Chen (State Key Laboratory for Novel Software Technology, Nanjing University, China), Tian Tan (State Key Laboratory for Novel Software Technology, Nanjing University, China), Minxue Pan (State Key Laboratory for Novel Software Technology, Nanjing University, China), and Yue Li (State Key Laboratory for Novel Software Technology, Nanjing University, China)</i>	

Security and QA

ROSA: Finding Backdoors with Fuzzing	2816
<i>Dimitri Kokkonis (Université Paris-Saclay, CEA, List), Michaël Marcozzi (Université Paris-Saclay, CEA, List), Émilien Decoux (Université Paris-Saclay, CEA, List), and Stefano Zacchiroli (LTCI, Télécom Paris, Institut Polytechnique de Paris)</i>	
Analyzing the Feasibility of Adopting Google's Nonce-Based CSP Solutions on Websites	2829
<i>Mengxia Ren (Colorado School of Mines, USA), Anhao Xiang (Colorado School of Mines, USA), and Chuan Yue (Colorado School of Mines, USA)</i>	
Early Detection of Performance Regressions by Bridging Local Performance Data and Architectural Models	2841
<i>Lizhi Liao (Memorial University of Newfoundland), Simon Eismann (University of Würzburg, Germany), Heng Li (Polytechnique Montréal, Canada), Cor-Paul Bezemer (University of Alberta, Canada), Diego Elias Costa (Concordia University, Canada), André van Hoorn (University of Hamburg, Germany), and Weiyi Shang (University of Waterloo, Canada)</i>	
Practical Object-Level Sanitizer With Aggregated Memory Access and Custom Allocator	2854
<i>Xiaolei Wang (College of Electronic Science and Engineering, National University of Defense Technology), Ruilin Li (College of Electronic Science and Engineering, National University of Defense Technology), Bin Zhang (College of Electronic Science and Engineering, National University of Defense Technology), Chao Feng (College of Electronic Science and Engineering, National University of Defense Technology), and Chaojing Tang (College of Electronic Science and Engineering, National University of Defense Technology)</i>	

AI for Security 3

GVI: Guided Vulnerability Imagination for Boosting Deep Vulnerability Detectors	2867
<i>Heng Yong (Nanjing University, China), Zhong Li (Nanjing University, China), Minxue Pan (Nanjing University, China), Tian Zhang (Nanjing University, China), Jianhua Zhao (Nanjing University, China), and Xuandong Li (Nanjing University, China)</i>	
Decoding Secret Memorization in Code LLMs Through Token-Level Characterization	2880
<i>Yuqing Nie (Beijing University of Posts and Telecommunications, China), Chong Wang (Nanyang Technological University, Singapore), Kailong Wang (Huazhong University of Science and Technology, China), Guoai Xu (Harbin Institute of Technology, China), Guosheng Xu (Beijing University of Posts and Telecommunications, China), and Haoyu Wang (Huazhong University of Science and Technology, China)</i>	
Are We Learning the Right Features? A Framework for Evaluating DL-Based Software Vulnerability Detection Solutions	2893
<i>Satyaki Das (University of Southern California, USA), Syeda Tasnim Fabiha (University of Southern California, USA), Saad Shafiq (University of Southern California, USA), and Nenad Medvidović (University of Southern California, USA)</i>	
Boosting Static Resource Leak Detection via LLM-based Resource-Oriented Intention Inference	2905
<i>Chong Wang (Fudan University), Jianan Liu (Fudan University), Xin Peng (Fudan University), Yang Liu (Nanyang Technological University), and Yiling Lou (Fudan University)</i>	
Weakly-supervised Log-based Anomaly Detection with Inexact Labels via Multi-instance Learning	2918
<i>Minghua He (Peking University), Tong Jia (Peking University), Chiming Duan (Peking University), Huaqian Cai (Peking University), Ying Li (Peking University), and Gang Huang (Peking University)</i>	

Quantum SE

When Quantum Meets Classical: Characterizing Hybrid Quantum-Classical Issues Discussed in Developer Forums	2931
<i>Jake Zappin (William & Mary, Virginia, USA), Trevor Stalnaker (William & Mary, Virginia, USA), Oscar Chaparro (William & Mary, Virginia, USA), and Denys Poshyvanyk (William & Mary, Virginia, USA)</i>	

SE for AI with Quality 3

Improved Detection and Diagnosis of Faults in Deep Neural Networks Using Hierarchical and Explainable Classification	2944
<i>Sigma Jahan (Dalhousie University, Canada), Mehil B Shah (Dalhousie University, Canada), Parvez Mahbub (Dalhousie University, Canada), and Mohammad Masudur Rahman (Dalhousie University, Canada)</i>	

Lightweight Concolic Testing via Path-Condition Synthesis for Deep Learning Libraries	2957
<i>Sehoon Kim (UNIST, South Korea), Yonghyeon Kim (UNIST, South Korea), Dahyeon Park (UNIST, South Korea), Yuseok Jeon (Korea University, South Korea), Jooyong Yi (UNIST, South Korea), and Mijung Kim (UNIST, South Korea)</i>	
Mock Deep Testing: Toward Separate Development of Data and Models for Deep Learning	2970
<i>Ruchira Manke (Tulane University, USA), Mohammad Wardat (Oakland University, USA), Foutse Khomh (Polytechnique Montréal, Canada), and Hridayesh Rajan (Tulane University, USA)</i>	
RUG: Turbo LLM for Rust Unit Test Generation	2983
<i>Xiang Cheng (Georgia Institute of Technology), Fan Sang (Georgia Institute of Technology), Yizhuo Zhai (Georgia Institute of Technology), Xiaokuan Zhang (George Mason University), and Taesoo Kim (Georgia Institute of Technology)</i>	

Blockchain

An Empirical Study of Proxy Smart Contracts at the Ethereum Ecosystem Scale	2996
<i>Mengya Zhang (The Ohio State University, USA), Preksha Shukla (George Mason University, USA), Wuqi Zhang (The Hong Kong University of Science and Technology, China), Zhuo Zhang (Purdue University, USA), Pranav Agrawal (George Mason University, USA), Zhiqiang Lin (The Ohio State University, USA), Xiangyu Zhang (Purdue University, USA), and Xiaokuan Zhang (George Mason University)</i>	
Demystifying and Detecting Cryptographic Defects in Ethereum Smart Contracts	3009
<i>Jiashuo Zhang (School of Computer Science, Peking University, China), Yiming Shen (Sun Yat-sen University, China), Jiachi Chen (Sun Yat-sen University, China), Jianzhong Su (Sun Yat-sen University, China), Yanlin Wang (Sun Yat-sen University, China), Ting Chen (University of Electronic Science and Technology of China, China), Jianbo Gao (Beijing Key Laboratory of Security and Privacy in Intelligent Transportation, Beijing Jiaotong University, China), and Zhong Chen (School of Computer Science, Peking University, China)</i>	
Chord: Towards a Unified Detection of Blockchain Transaction Parallelism Bugs	3022
<i>Yuanhang Zhou (Tsinghua University), Zhen Yan (Tsinghua University), Yuanliang Chen (Tsinghua University), Fuchen Ma (Tsinghua University), Ting Chen (University of Electronic Science and Technology of China), and Yu Jiang (Tsinghua University)</i>	
Definition and Detection of Centralization Defects in Smart Contracts	3035
<i>Zewei Lin (Sun Yat-sen University, China; Peng Cheng Laboratory, China), Jiachi Chen (Sun Yat-sen University, China), Jiajing Wu (Sun Yat-sen University, China), Weizhe Zhang (Harbin Institute of Technology, China; Peng Cheng Laboratory, China), and Zibin Zheng (Sun Yat-sen University, China)</i>	
Fork State-Aware Differential Fuzzing for Blockchain Consensus Implementations	3048
<i>Wonhoi Kim (KAIST), Hocheol Nam (KAIST), Muoi Tran (ETH Zurich), Amin Jalilov (KAIST), Zhenkai Liang (National University of Singapore), Sang Kil Cha (KAIST), and Min Suk Kang (KAIST)</i>	

Code Cloning in Solidity Smart Contracts: Prevalence, Evolution, and Impact on Development....	3060
<i>Ran Mo (Central China Normal University), Haopeng Song (Central China Normal University), Wei Ding (Central China Normal University), and Chaochao Wu (Central China Normal University)</i>	

Poster

Pattern-based Generation and Adaptation of Quantum Workflows	3072
<i>Martin Beisel (University of Stuttgart, Germany), Johanna Barzen (University of Stuttgart, Germany), Frank Leymann (University of Stuttgart, Germany), Lavinia Stiliadou (University of Stuttgart, Germany), Daniel Vietz (University of Stuttgart, Germany), and Benjamin Weder (University of Stuttgart, Germany)</i>	
BSan: A Powerful Identifier-Based Hardware-Independent Memory Error Detector for COTS Binaries	3085
<i>Wen Zhang (University of Georgia, USA), Botang Xiao (University of Georgia, USA), Qingchen Kong (University of Georgia, USA), Le Guan (University of Georgia, USA), and Wenwen Wang (University of Georgia, USA)</i>	
RustAssistant: Using LLMs to Fix Compilation Errors in Rust Code	3097
<i>Pantazis Deligiannis (Microsoft Research, USA), Akash Lal (Microsoft Research, India), Nikita Mehrotra (Microsoft, India), Rishi Poddar (Microsoft Research, India), and Aseem Rastogi (Microsoft Research, India)</i>	
Your Fix Is My Exploit: Enabling Comprehensive DL Library API Fuzzing with Large Language Models	3110
<i>Kunpeng Zhang (The Hong Kong University of Science and Technology), Shuai Wang (The Hong Kong University of Science and Technology), Jitao Han (Central University of Finance and Economics), Xiaogang Zhu (The University of Adelaide), Xian Li (Swinburne University of Technology), Shaohua Wang (Central University of Finance and Economics), and Sheng Wen (Swinburne University of Technology)</i>	
BDefects4NN: A Backdoor Defect Database for Controlled Localization Studies in Neural Networks	3123
<i>Yisong Xiao (Beihang University, China), Aishan Liu (Beihang University, China), Xinwei Zhang (Beihang University, China), Tianyuan Zhang (Beihang University, China), Tianlin Li (Nanyang Technological University, Singapore), Siyuan Liang (National University of Singapore, Singapore), Xianglong Liu (Beihang University, China; Zhongguancun Laboratory, China), Yang Liu (Nanyang Technological University, Singapore), and Dacheng Tao (Nanyang Technological University, Singapore)</i>	
Leveraging Propagated Infection to Crossfire Mutants	3136
<i>Hang Du (University of California, Irvine), Vijay Krishna Palepu (Microsoft, Silicon Valley Campus), and James A. Jones (University of California, Irvine)</i>
